

Robot Vacuum / Mop — Buying Report (June 2026)

For: Downstairs — mainly carpet + hard-floor kitchen & utility. **Hard constraints:** Budget ceiling **£450 total (incl. dock)** · **pet hair** a big factor · **auto mop-lift on carpet is CRITICAL** (carpet must stay dry) · **good Home Assistant / local control preferred.**

Research method: 5 parallel web-research agents (roundups, mop-lift mechanisms, Home Assistant integration, pet-hair/anti-tangle testing, live UK pricing) + brand-by-brand UK price checks. Prices accessed **22 June 2026** and are deal-driven — **re-confirm at checkout.**

TL;DR — my pick for your home

Buy the Dreame L10s Ultra Gen 2 (~£289–£359). It is the only sub-£450 model that ticks *all three* of your priorities at once: - **Auto mop-lift 10.5 mm** (MopExtend) — genuinely keeps medium-pile carpet dry. - **Full auto dock** — self-empty + mop self-wash + auto-dry + water refill. - **Best-in-class Home Assistant story** — Dreame is the easiest brand to **root for Valetudo** (100% local, no cloud) *and* has the best custom HA integration (Tasshack). Nothing else here comes close on local control.

If you want **maximum carpet-dry insurance** (thick/plush carpet) and don't mind weaker HA → **Eufy X10 Pro Omni (~£429, 12 mm lift)**. If you want the **cheapest** model that still does everything → **Ecovacs Deebot N30 Pro Omni (~£249)**.

The three tiers

Budget-friendly — Ecovacs Deebot N30 Pro Omni · ~£249

(verify it's the Pro Omni SKU and in stock — see caveat)

Spec	Detail
Suction	10,000 Pa
Auto mop-lift	Yes — 9 mm , ultrasonic carpet detect
Brush (pet hair)	ZeroTangle 2.0 comb system — actively de-tangles long hair
Dock	Full Omni — self-empty (2.6 L bag, ~75 days) + hot-water (60°C) mop wash + hot-air dry
Home Assistant	Official HA integration, but cloud-bound (Ecovacs account) — no local/Valetudo path
Price	~£249 (Amazon UK). Ecovacs' own UK store currently sold out

Why it's remarkable: a full hot-wash Omni dock + 10,000 Pa + auto mop-lift + anti-tangle brush for ~£250 is exceptional value and meets every functional requirement. **Caveats:** (1) The £249 price is low

enough that you must confirm it's the *N30 Pro Omni* (not the cheaper non-Pro N30) and not a lapsed lightning deal. (2) **9 mm lift** is the lowest of the recommended set — fine for low/medium pile, but **borderline on thick/plush carpet**. (3) Cloud-only for HA.

Mid-range — Dreame L10s Ultra Gen 2 · ~£289–£359 *best overall for you*

Spec	Detail
Suction	~10,000 Pa (Dreame Vormax rating)
Auto mop-lift	Yes — 10.5 mm (MopExtend) — clears medium-pile carpet, keeps it dry
Brush (pet hair)	Floating tangle-resistant rubber brush + ultrasonic carpet recognition
Dock	Full auto — self-empty + mop self-wash + auto-dry + water refill
Home Assistant	Best in class. Rootable for Valetudo (fully local, no cloud) + excellent Tasshack custom integration (live maps, per-room, zones)
Price	£289 (Dreame UK store, Gen 2) · ~£349 (Gen 3 Kit) · up to £479 mainstream

Why it's my top pick: it's the sweet spot — strong 10.5 mm lift, full dock, decent pet-hair brush, and it's the *only* brand here that lets you cut the cloud entirely. For an HA Green household that values local control, that's decisive. It also costs **less than the "best" tier**, so you're not paying more for the right answer. **Caveats:** Confusing product naming (Gen 2 vs Gen 3 Kit vs original) — buy the **Gen 2** for the 10.5 mm MopExtend lift at ~£289. Its single rubber brush is good-but-not-elite on tangle vs the dual-roller models below.

Best within budget — two strong options (~£399–£429)

Option A — Roborock Qrevo S5V · £399.99 (*Roborock UK store; cheapest Roborock with mop-lift*)

Spec	Detail
Suction	12,000 Pa
Auto mop-lift	Yes — 10 mm , single-run carpet+floor cleaning
Brush (pet hair)	DuoRoller dual rubber rollers — ~99% pet-hair pickup, genuinely anti-tangle
Dock	All-in-One — self-empty + mop self-wash + warm-air dry + water refill
Home Assistant	Official, polished Roborock HA integration (maps, room cleaning). But cloud-tethered — maps/routines always fetched via cloud; new units may not be Valetudo-rootable
Price	£399.99 (uk.roborock.com, was £599.99)

Best for: strongest pet-hair brush of the set + the most polished out-of-the-box HA experience — *if* you accept Roborock's cloud for maps.

Option B — Eufy X10 Pro Omni · ~£429 (*max carpet-dry insurance*)

Spec	Detail
Suction	8,000 Pa
Auto mop-lift	Yes — 12 mm (highest in class) — the safest for thick/plush carpet
Brush (pet hair)	Twin-turbine + detangling comb; rated "excellent" on pet hair across hard floor <i>and</i> carpet
Dock	All-in-One Omni — self-empty + mop wash + auto-dry + water refill
Home Assistant	Weakest of the three — community fork only (damacus / robovac), local-key extraction, no Valetudo, limited maps
Price	£429 (Argos / Currys, was £599)

Best for: if keeping a **thick carpet bone-dry** outranks HA quality, the 12 mm lift is the strongest guarantee here.

Side-by-side

Model	Price	Suction	Mop-lift	Pet brush	Dock	HA / local control
Ecovacs N30 Pro Omni	~£249	10,000 Pa	9 mm	ZeroTangle comb	Hot-wash Omni	Cloud only
Dreame L10s Ultra Gen 2	£289–359	~10,000 Pa	10.5 mm	Rubber, anti-tangle	Full auto	Valetudo + best integration
Roborock Qrevo S5V	£399.99	12,000 Pa	10 mm	DuoRoller (best)	Mop-wash Omni	Official, cloud-tethered
Eufy X10 Pro Omni	£429	8,000 Pa	12 mm (best)	Twin-turbine + comb	Omni	Community fork, fiddly

What to AVOID for your home (and why)

- **Roborock Q5 Pro+ / Q7 Max+ / Q8 Max+** — *no auto mop-lift* (fixed pad). The Q8 Max+ vacuums carpet superbly but you'd have to manually remove the mop and run two cycles for your carpet+kitchen layout. Q7 Max+ also scored **poorly on pet hair (1.7/5)**. Only the **Qrevo** line lifts the mop.
- **TP-Link Tapo RV30 Max Plus (~£180)** — cheap and has genuinely *local, no-cloud* HA control, **but no true mop-lift** (it just avoids carpet when mopping) and reviewers said it **struggles with pet hair on carpet**. Doesn't meet your critical requirement.
- **Eufy X8 Pro / RoboVac line** — heavily discounted but **no mop-lift, no mop-wash dock**, and mostly end-of-life clearance stock.
- **Dreame L10s "Plus / Pro / Gen 1"** — only **7 mm** lift; won't keep medium/thick carpet dry. Buy the **Gen 2** specifically.
- **Shark (Matrix Plus / PowerDetect)** — never publishes suction figures, and the **Home Assistant integration is currently broken** (cloud-only workaround). Bad fit for an HA household.

Running costs (rough, per year)

- **Dust bags** (self-empty dock): ~£15–25/yr (a 3-pack lasts ~6–9 months for one pet household).
 - **Mop pads**: ~£10–20/yr.
 - **Side brush + filter**: ~£10–15/yr.
 - **Main brush**: ~£15–20 every 12–18 months.
 - **Estimate**: ~£45–80/yr in consumables across all four models — broadly similar. Bagless docks (some Ecovacs/Roborock) save on bags but need more manual cleaning.
 - **Hot-water mop-wash docks** (Ecovacs N30 Pro, Dreame, Roborock Qrevo) clean mop pads better → less smell, fewer pad replacements over time.
-

Home Assistant — local-control ranking (your weighting)

1. **Dreame** — *winner*. Rootable for **Valetudo** (zero cloud, maps stay on-robot) + best custom integration (Tasshack). Buy this if local control matters.
 2. **Roborock** — most polished official HA integration, **but never fully cloud-free**; newer budget units may be unrootable. Great if you accept cloud for maps.
 3. **Ecovacs** — official HA integration exists but **cloud account required**; no local path.
 4. **Tapo (TP-Link)** — genuinely **local, no cloud**, but basic (start/stop/dock/fan only, **no maps/rooms**).
 5. **Eufy** — works but **fragmented/fragile** (community forks, local-key extraction, no Valetudo).
 6. **Shark** — **avoid**; official integration broken, cloud-only workaround.
-

Decision shortcut

- **Want the best all-rounder for an HA home, spend the least for the right answer** → Dreame L10s Ultra Gen 2 (~£289–£359).
 - **Carpet is thick/plush and dry-carpet is everything** → Eufy X10 Pro Omni (£429, 12 mm).
 - **Cheapest that still does the whole job** → Ecovacs Deebot N30 Pro Omni (~£249).
 - **Best pet-hair brush + polished app, OK with cloud** → Roborock Qrevo S5V (£399.99).
-

Caveats / confidence

- All prices are **promotional and move weekly** — confirm the live figure at checkout. The Dreame and Ecovacs in particular swing a lot.
- US test-lab figures (Vacuum Wars, RTINGS) apply to the same models sold in the UK.
- **Verify before buying**: that the Ecovacs is the *N30 Pro Omni*; that the Dreame is the *Gen 2* (10.5 mm lift, not the 7 mm older versions); that a new Roborock unit you want to root isn't a post-2024 SkyHigh-NAND build (currently unrootable for Valetudo).
